#AlzFastTrack
2016 Alz Fast Track Program At-a-Glance*

Neuropathology of AD  
*Thomas Montine, MD, PhD, Stanford

Down’s Syndrome and AD  
*Lotta Granholm-Bentley, DDS, PhD, U Denver

Biomarkers of AD Risk: ApoE  
*G. William Rebeck, PhD, Georgetown

Imaging Biomarkers for AD  
*Michael Yassa, PhD, UC Irvine

Promoting Neural Plasticity Using Focused Ultrasound  
*Isabelle Aubert, PhD, Sunnybrook, U Toronto

Metabolic Disorders/Insulin Resistance in AD  
*Suzanne Craft, PhD, Wake Forest

Conformational Diversity of Amyloid in AD  
*Charles Glabe, PhD, UC Irvine

Synapses in AD  
*William Klein, PhD, Northwestern

Epigenetic Dysregulation in Aging and AD  
*Harry W.M. Steinbusch, PhD, Maastricht U, The Netherlands

Brainstem Dysfunction in AD  
*Fred van Leeuwen, PhD, Maastricht U, The Netherlands

Neuroinflammation & Neurodegeneration in AD  
*Kim Green, PhD, UC Irvine

Targeting Pathological Aβ Aggregates in AD  
*Cynthia Lemere, PhD, Brigham & Women’s, Harvard

Vascular Contributions to AD  
*Helena Chui, MD, U Southern California

Translational Challenges of Mouse Models in AD  
*Frank M. LaFerla, PhD, UC Irvine

Challenges in AD Clinical Trials  
*Joshua Grill, PhD, UC Irvine

Improving Translation of Basic Research Findings  
*Hugo Geerts, PhD, In Silico Biosciences, U Penn, Drexel

*Titles have been edited for length
